STOBAG - Premium Swiss Quality

Stay cool in the shade

Shade means quality of life.

Your increasing demand for convenience, functionality and design has motivated us time and again to develop innovative solutions - and this since 1964.

Whether for balconies or terraces, conservatories or facades - as the leading Swiss manufacturer, STOBAG offers a wide range of individual awning systems to suit all requirements.

Your shade oasis can be comfortably expanded and automated through cleverly devised comfort options.

Plunge into the inspired world of colours and forms. Experience the fantastic symbiosis of quality, technology and design.

Quality and safety

We guarantee you durable products in uncompromising quality. We achieve this through the consistent use of high quality materials, modern and environmentally sustainable production processes as well as continuous safety inspections.

Functionality & Technology

Our many years of experience and close cooperation with specialists, architects and planners enable us to develop innovative products that meet the highest demands.- yesterday, today and tomorrow.

Aesthetics & design

Emotions turn our daily routine into an adventure. The influence of colours and forms play a central role in this. Therefore STOBAG awnings are customised for you. Select from over 350 cover designs and countless frame colours and you can achieve the perfect harmony between architecture and environment

The choice of the colour of an awning cover affects the play of light and shade just as much as the environment around it.

All non mesh awning fabrics possess a high UV protection factor and filter out at least 90% of UV rays (=SPF12), most filter to SPF30 and some filter to SPF50

Dickson Orchestra, TT, LONDON COLLECTION and Sattler Elements, 308..., Firemaster, Reflect 355 have been tested against strict standards.

Subject to change without prior notification

eürofürst

The LONDON COLLECTION contains selected fabric patterns exclusively designed for STOBAG by colour specialists and interior designers. Because of the special Jacquard weaving technology, some of the LONDON COLLECTION designs cannot be used or used only to a limited extent for some types of awnings.

Sattler PERFORA is a perforated awning fabric made from solution dyed acrylic fibre. The evenly structured perforations make this attractive fabric an attractive alternative for customised light, sight and glare protection for vertical awnings. Use the PERFORA fabric and its exclusive visual attraction as an element in your living space design.

eürofürst

ALL WEATHER TT/308
ALL WEATHER fabrics Dickson TT and Sattler 308 are treated with a special additional coating and are suitable for awnings which must be especially waterproof (minimum 800mm water column height). All ALL WEATHER patterns are also available in standard quality.

TENCATE
TENCATE is 100% polyester and is an alternative to the ALL WEATHER acrylic fabrics. Advantages: long life, easy care, UV resistant, non fading and weatherproof.

eürofürst

REFLECT/REFLECT AIR.
REFLECT 355 is made of 100% solution dyed acrylic fibres complemented by a weather resistant coating. This particularly attractive fabric is also available in perforated form, REFLECT AIR 353. It's evenly sized perforations give this fabric good transparency and very good sight and glare protection. The air permeable structure also prevents the buildup of heat under the awning and creates a pleasant climate.

TWILIGHT
The high tech partially aluminium vaporised structure of the TWILIGHT fabric produces a very low weight per area. Nevertheless, the special feature of this fabric quality is its great strength which expands its possibilities for use in vertical shading enormously.

eürofürst

FIREMASTER PLUS

Non-flammable materials are becoming ever more important in the construction industry. FIREMASTER PLUS not only meets the DIN Norm 4102 B1/ VKF 5.2 fire protection standard, but also has a waterproof special coating as an additional extra.

FIREMASTER® PLUS

The non-flammable awning fabric!

SUNPRINT

The SUNPRINT 314 D10 fabric in high quality acrylic fibre with TEXgard coating and a digital surface print, stands out for its stability and guaranteed bright printed colours. A hi-tech product of the extra class for a perfect printed finish.

SUNPRINT

Digital printing on awning covers is the ideal advertising medium

eürofürst

SUNVISION

Made from solution dyed acrylic and PVC coated polyester, SUNVISION convinces through its unique textile look, extreme colour fastness and high resistance to the weather and mechanical stresses.

SUNWORKER

SUNWORKER has been specially developed for the needs of modern architecture. With its sun protection features in conjunction with a high transparency, this fabric makes a significant contribution to energy saving and creates a pleasant atmosphere.

eürofürst

SOLTIS 86
SOLTIS 86 is the ideal fabric as a compromise between the required degree of sun protection and transparency. It provides a better view outside and the visual comfort so highly valued in many architectural applications.

SOLTIS 92
SOLTIS 92 fabric allows you to protect your personal space and comfort without restricting your view outside. It provides natural light while protecting against glare.

Awning accessories and options

Colours

Powdercoating elements are implemented more often with façade design in current architecture.

As the leading awning manufacturer we have been using this environment friendly and high quality finishing technology, which provides durable protection, for years. Whether RAL, NCS or various special colours from our TOP TEN palette, the colour selection is almost limitless.

Automation

We offer you exactly the comfort that you want from your individual awning system, from simple wind sensors to complex centralised air-conditioning. Regardless of whether you extend an awning via remote control, turn on atmospheric lighting or you want to control the façade and conservatory awning system in groups: our reliable automatic systems master any situation.

Material

Play of colours and UV protection..

The colour selection of an awning cover influences the play of light and shade in the same manner as the perception of the environment. All awning covers are tested according to strict norms. They provide a high UV protection factor and filter at least 90% of UV rays. - Let our cover collection inspire you.
